

HEALTH AND SOCIAL DEVELOPMENT

(FORMERLY EPOS HEALTH MANAGEMENT)

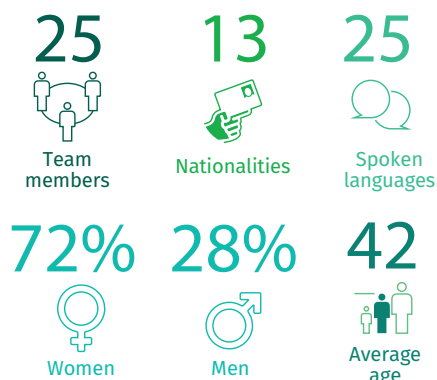

**Providing health and social solutions
to improve human well-being**

We reinforce good governance for improved health services accessibility and quality for all people.

WE BELIEVE

Emerging global health priorities demonstrate the need for concentrated efforts to put people first and provide inclusive, ethical and sustainable healthcare solutions. We believe that better health contributes to a more powerful society, which in turn strengthens economic development, peace and prosperity. Therefore, our goal is to enable Health for All through a cross-sectoral approach that integrates health and social considerations in all aspects of policy-making and development.

WE ARE

We are a team of dedicated multi-disciplinary professionals who are passionate about promoting social development, improving and protecting human health, and ensuring universal access to health services for all. Innovation, transformation and excellence are our guiding principles.

We advise and support governments, ministries, health and social insurance funds, regional and local health and social authorities, health and social service providers to increase both their operational efficiency and quality of services provided. We have global presence through our strong partnerships with the private sector and research institutions, reinforced by our well-established national and regional networks around the world.

Thus, we bring international know-how, products and services in health management and social development and tailor them to our clients' needs to provide cost-effective solutions. We act as enabler to translate best practice into adapted solutions for our development partners' current challenges, transforming them into an effective response.

WE WORK

We offer solid and extensive expertise gained over the last 35 years in over 400 projects across the globe covering the following areas:
